Gender equity at scientific events F. Débarre, N. O. Rode, and L. V. Ugelvig	148
Is there indirect selection on female extra-pair reproduction through cross-sex genetic correlations with male reproductive fitness? Jane M. Reid and Matthew E. Wolak	159
Strong hybrid male incompatibilities impede the spread of a selfish chromosome between populations of a fly Rudi L. Verspoor, Jack M. L. Smith, Natasha L. M. Mannion, Gregory D. D. Hurst, and Tom A. R. Price	169
Last male sperm precedence is modulated by female remating rate in <i>Drosophila melanogaster</i> Meghan Laturney, Roel van Eijk, and Jean-Christophe Billeter	180
The relation between R. A. Fisher's sexy-son hypothesis and W. D. Hamilton's greenbeard effect Gonçalo S. Faria, Susana A. M. Varela, and Andy Gardner	190
A general model of biological signals, from cues to handicaps Jay M. Biernaskie, Jennifer C. Perry, and Alan Grafen	201
Recent admixture between species of the fungal pathogen <i>Histoplasma</i> Colin S. Maxwell, Victoria E. Sepulveda, David A. Turissini, William E. Goldman, and Daniel R. Matute	210
Evolution of bacteria specialization along an antibiotic dose gradient Noémie Harmand, Romain Gallet, Guillaume Martin, and Thomas Lenormand	221
Genetic conflict with a parasitic nematode disrupts the legume–rhizobia mutualism Corlett W. Wood, Bonnie L. Pilkington, Priya Vaidya, Caroline Biel, and John R. Stinchcombe	233
Mutual fitness benefits arise during coevolution in a nematode-defensive microbe model Charlotte Rafaluk-Mohr, Ben Ashby, Dylan A. Dahan, and Kayla C. King	246

Aims and Scope

Evolution Letters publishes cutting-edge new research in all areas of Evolutionary Biology. Papers should demand rapid publication because they substantially advance the field, are of outstanding clarity and originality, or are of broad interest. Papers that introduce new analytical or methodological frameworks that are likely to be highly influential will also be considered. Opinion and commentary articles on new developments or emerging themes are also encouraged. Traditional reviews will not be considered, as plenty of appropriate forums for these already exist. The Editor-in-Chief and Editorial Board welcome enquiries about other forms of article. *Evolution Letters* is jointly owned by the European Society of Evolutionary Biology (ESEB) and the Society for the Study of Evolution (SSE). Profits from the journal are invested back into the two societies. The journal is online only and entirely open access. The journal has a flexible approach to the format of manuscripts on submission, and will only ask authors to adhere to a house style (see Instructions for Authors) once the manuscript is accepted for publication.

Open Access and Copyright

All articles published by *Evolution Letters* are fully open access: immediately freely available to read, download and share. All articles are published under the terms of the Creative Commons Attribution License which permits use, distribution and reproduction in any medium, provided the original work is properly cited and allows the commercial use of published articles. Copyright on any research article in a journal published by *Evolution Letters* is retained by the author(s). Authors grant Wiley a license to publish the article and identify itself as the original publisher. Authors also grant any third party the right to use the article freely as long as its integrity is maintained and its original authors, citation details and publisher are identified. Further information about open access license and copyright can be found at <http://www.wileyopenaccess.com/details/content/12f25db4c87/Copyright%E2%80%9393License.html>
